Youth Peace Literacy Life Skills Program

Understanding the Conditioned Mind That Creates the Bully/Victim Cycle

From the Playground to the Battlefield
What is the general intent?

To provide a multi-level career-training program where participants develop the ability to conduct the Youth Peace Literacy Life Skills program that helps young people to:

- Learn how to resolve conflict peacefully
- Develop excellent character-development skills
- Reduce stress by providing positive outlets
- Understand the importance of healthy living
- Train in a safe environment to protect themselves
- Learn a comprehensive Life Skills Program
- Recognize the value of community service
  - Improve academic performance
Why is it important to have a quality character development program for young people?

In our fast pace, high stress competitive world young people need a safe place where they can have the leisure to explore themselves and the world around them.

The intent of conventional education is to teach academic skills to prepare young people vocationally. But young people also need a host of day-to-day life skills other than academics to be able to successfully cope with the challenges of living. In an atmosphere of friendship young people need to be allowed to inquire into the essential questions of what it means to live with intelligence, to create healthy guidelines for their behavior and to be able to understand and resolve conflict peacefully. Such is the intent of YPL Life Skills Program.

How is the YPL Life Skills Program different from other programs?

The YPL Life Skills Program focuses on the prevention of conflict in understanding what the root causes are in conditioned thinking.

For one thing this program differs from other conflict education/bullying programs is that it is a complete program that teaches young people how to prevent, resolve and manage conflict whereas most conflict education/bullying program focus superficially on the tertiary or management level after a conflict has already occurred.
Are children being genetically born to bully?

There is current significant evidence from the Centre for Infant Cognition at the University of British Columbia that states episodes of bullying that mar early grade school years for hundreds of children may be a partial result of the victim’s DNA.

The study shows that behaviors that most often lead to exclusion and victimization in the classroom or schoolyard have their roots in a student’s genes arguing that children’s genetic makeup has a direct impact on the quality of the interactions they enjoy with their peers.

The study also shows infants learn social stratification as early as nine months. Since according to the study children are being genetically programed to bully, bullying programs now need to address this inborn root cause of conflict by providing innovative environments to prevent this individual and social disorder from occurring. This is the intention of the YPL Life Skills program.
What occupations would benefit using the YPL Life Skills Program?

**After School Programs**
Work in a setting that provides young people with conflict education/character development life skills after school. This could come under a YPL Life Skills Program outreach program.

**Community Centers**
One could initiate and run a number of these programs in this type of facility. In this way one doesn’t need the financial or marketing skills necessary to operate the program as they would if one opened for example, an independent facility of their own. For some people this is a better option in that they have less responsibility in the administration of the program and therefore will have more time available to teach.

**Workshop Presenter/Trainer**
There is a career opportunity in being a Workshop Presenter/Trainer where one is paid to present this program to educators, counselors, school administrators, law enforcement, business personnel and the like who are interested in implementing these skills into their occupational environments.

**Summer Camp Director/Employee**
Summer time is an especially good occasion to do this program for parents are looking for a comprehensive program that can be taught each day over an extended period of time. This affords one the luxury to go into depth into the more complex issues of conflict education and character development in a cohesive developmental process with little interruption of the learning process. This allows for a better retention for the young person’s natural educational progression.
At Risk Youth
The Atrium Society’s special bullying program has been used with youth at risk nationally and internationally with much success. The program is specially designed to more accurately meet the needs of these special youth. It includes teaching specific child safe mental and physical skills, within a safe and controlled environment, to educate young people in the awareness, resolution, and management of conflict through nonviolent means so they can experience a reduction in emotional and physical impulsivity. The fundamental intent of this program is to stop conflict at the primary prevention level but also at the secondary and tertiary level, and to learn from youth who are at risk as well as identified as problematic behaviorally.

Children of War
The Education for Peace Life Skills Program has been used successfully with over 5000 Liberian children of war since 2003. The first one used for these war torn children in Liberia by Dr. Marvin Davis is Why Is Everybody Always Picking On Us? Understanding the Roots of Prejudice, which generated the internationally claimed book Brave New Child – Liberating the Children of Liberia and the World.

Please note: all the components of the programs below are taught in a multilevel context of role-playing, games, and other educational activities that developmentally enhances the child’s ability to comprehend the information in a more multifaceted manner thus increasing the potential for learning. The proper amount of time needs to be given to teach the components of the program. The minimum amount of time per week should be 2 hours. It is obviously better to have more time thus teaching the components of the program are best taught during a holiday or summer time. In other words it is essential that a continuity be developed consistently over time for young people to grasp the essential insights in the program without undo interruption.)

Conflict Education

The Conflict Education Component*

The approach is a holistic three-level system called The ABC of Conflict Education™. The three levels are: Avoid - Bargain - Control. Each level helps young people keep from being bullied in the following ways:

**Avoid**
By understanding what causes people to bully in the way they have been genetically and socially conditioned to think and act either as a bully or a victim, a young person can prevent conflict from arising.

**Bargain**
Through the use of verbal Mental Self-Defense Skills, a young person can learn to use words instead of fists to resolve a bullying situation.

**Control**
A young person who learns how to handle hurt feelings in a positive way is less likely to react in overly aggressive manner when hassled by a bully, and more likely to maintain control. It also helps them to control a potential conflict situation by having the confidence gained through learning humane self-defense skills so they don't react unnecessarily in a freeze/ fight or flight manner. Developing one’s level of understanding, learning verbal mental self-defense skills, becoming wise in ways to handle hurt feelings all lead to an increase in self-confidence in tough situations and learning to think quickly and efficiently when necessary.

Ten Stages of Bullying - From the Playground to the Battlefield

1. Why do we bully?
When we can understand the causes of bullying - that is rooted in the way we think- we can prevent it.

2. Why is everybody always picking on me?
When a bully finds a victim to torment, there are always reasons. A victim benefits from knowing the answer to this question and to how a bully thinks.

3. Why am I always picking on myself?
Each of us has an “inner bully” - an inner voice that nags us, intimidates us. This is where bullying continues after one has been personally picked on by another person.

4. Why can’t I do what I want?
Young people need to learn that for every right there is a corresponding responsibility. Leaning this makes for a balanced frame of mind in one’s relationship to others and the world.

5. Why is everybody always picking on us?
When we learn to hate and fear because someone else is different then we are caught in prejudice. Whether it is the color of one’s skin, nationality, age, disability, gender or religion it only creates pain and suffering.

6. Why are we always letting the bullies pick on them?
Bystanders often don’t want to stop a bully situation. Many times they encourage it. But a peacefully skilled bystander can be powerful and resourceful in stopping a bullying incident.

7. Why are they always getting picked on?
Youth-at-risk are bullied by fellow youth and by adults. Understanding how and why they are picked on - by the youth themselves as well as by parents and teachers - can lead to helping these young people lead more healthy lives.

8. Why are we always picking on each other?
Wars break out because one group of people bullies another. It is vitally important to understand how and where this bullying begins in childhood so that young people can begin to end it on the playground before it gets to the battlefield.

9. Are we hardwired for war?
Is it possible that what is inciting people to be in conflict, mainly collective conflict between groups of people who physically attack each other, a genetically generated misplaced instinct for survival?

10. Are we born to bully?
“Most honest combat vets will tell you, perhaps not eloquently but in their own way, the same thing: essentially that combat is in our human DNA and demands to be exercised .... The question is, can we humans evolve peacefully, or will we succumb to instincts we can’t transcend?”
- Former Marine Corp helicopter pilot in Vietnam

• Chosen as a focus, and highly praised at the International Congress for Teachers for Peace, Paris, France

• The Center for Applied Psychology, Inc. cites Dr. Terrence Webster-Doyle as an “eloquent leader of the movement to combine principles of education, psychology, and the martial arts to teach young people to resolve conflict peacefully.”
“Webster-Doyle’s insight is that by recognizing, understanding, and accepting our violent tendencies, we can avoid acting them out. These new books ... are good for teachers and parents of elementary school children who need appropriate language and activities to help children deal with their feelings and the violence-provoking parts of the environment. To this reviewer, they are realistic and practical.” - *Young Children* (Magazine of the National Association for the Education of Young Children)

Dr. Webster-Doyle’s books are archived in perpetuity at the University of Connecticut’s Northeast Children’s Literature Collection, Swarthmore College Peace Collection and the University of Southern Mississippi’s de Grummond Children’s Literature Collection. The work is also on permanent display in the International Museum of Peace and Solidarity in Samarkind, Uzbekistan, the Commonwealth of Independent States, at the Hiroshima Peace Memorial Museum, Hiroshima Japan and at the Samara State Academy of Culture and Arts, Samara Russia. The work is also archived in perpetuity at No Gun Ri International Peace Foundation, South Korea.
